SPOT ON PERFECT!!!

Power by way of sophisticated simplicity… The Nita AE612MKII 100% servo driven stand-alone labeling head is the ideal choice for applying a label to **wherever** you need, <u>whenever</u> you need it. Rejoice in 1570 inches per minute of accurate, consistent and trouble-free label application!

We like to think the only place this machine may not be able to apply a label is **INSIDE** your container!

Wipe-On and Tamp Blow configurations available.

CONSISTENTLY DIFFERENT!

We know you need a reliable machine to print and apply <u>all</u> the variable information required in today's on-demand environment! Integrating leading print engines like Zebra and Sato, the STA616 series of Print & Apply labeling machines are industrial **WORKHORSES** designed to keep your line humming!

A wide range of accessories allow for applications anywhere on your product.

LEADING EDGE	**TRAILING EDGE**	**ADJACENT SIDES**	**CORNER WRAP**

A NOTE FROM US TO YOU…

Dear (not-too-distant) future Nita customer,

Thank you for taking the time to read through this brochure. In doing so you are already 1 step closer to understanding how North America's most technologically advanced and easiest to use fully automatic inline label application system can help you!

For **25** AMAZING years Nita has been engineering the finest machinery around. Our systems are built to **INCREASE** production rates, decrease operator headaches, eliminate maintenance issues and generally make everyone's lives easier (and **happier**)!

There really is **NOTHING** like a Nita. Every new client we get who has run every other conceivable brand under the sun has told us we simply build a better labeling machine than anything they have ever seen. Their words, not ours…

We are very excited for you to experience the satisfaction of owning a **Nita Smart Labeling System!**

For the love of labeling,

The Nita Family
